## GENERAL INSTRUCTIONS FOR ERECTION AND USE OF RUBBISH CHUTES

The fixing frame is attached to the scaffolding by using 4 coupling pieces, always ensure that the couplings are securely tightened.

The top rubbish chute bracket is connected to the short chains on the fixing frame, other chutes are then connected onto the chute brackets.

A Top Hopper is placed inside the chute section, care should be taken to ensure debris can not escape down the sides.

The standard frame is designed to safely suspend 35 chute section.

Please note these are guidelines only – the user should ensure they obtain latest recommendations from sources such as H.S.E, NASC and Hire Associations.
